

TODAY, ACCURATE MEASURING JUST BECAME EASIER!

When it comes to measuring, today's professionals have long since sworn by real laser technology. Tedious measurements with tapes and metre sticks are finally things of the past and ultrasonic devices are too inaccurate. Use laser technology – incorporated into the PREXISO X2 to your advantage. For quick, precise and reliable measurements. Measure like the professionals!

Inaccessible places
PREXISO X2 measures where a measuring tape or metre stick cannot reach. E.g. for great heights and inaccessible places.

Alterations and renovations
Do away with measuring errors, inaccurate estimates and awkward measurements! With PREXISO X2 you have all the dimensions under control at a press of a button.

Small jobs around the house
Hang pictures perfectly, cut material accurately to size, and much more: No problem with PREXISO X2!

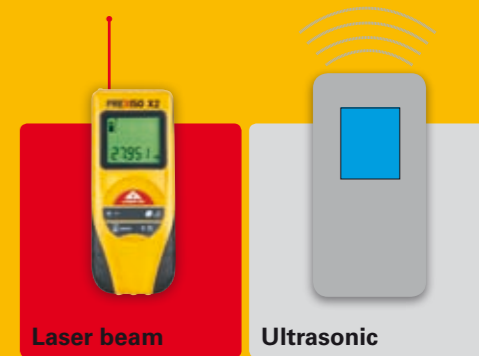

Plan and install
Calculate areas, capture room sizes and measure distances in seconds. More accurately than ever before with PREXISO X2.

There's nothing more accurate than Laser Measuring!

Not all electronic distance meters that look like lasers actually have laser technology inside. However, the difference is critical. You can see the highly accurate laser beam is far superior to the conical ultrasonic waves in any measuring application:

	Laser beam	Ultrasonic
Accuracy	+/- 2 mm	approx. +/- 50 mm
Measures from-to	0.10 – 30 m	approx. 1 – 15 m
Measures	btwn. 0°C and + 40°C always the same accuracy	inaccurate in fluctuating temperatures
Measures directly	even in inaccessible places	only if there are no obstructions present (scatter problem)
Measurements on a inclined wall	always accurate to the laser point	inaccurate due to scatter
Measurements along a wall	always accurate to the laser point	inaccurate due to scatter
Overall performance	very good	poor

CAUTION
LASER RADIATION – DO NOT
STARE INTO BEAM
620-690nm/0.95mW max.
CLASS II LASER PRODUCT

Laser class II in accordance
with FDA 21CFR Ch. 1 § 1040
Laser class 2 in accordance with
IEC 60825-1 and EN 60825-1

**Easier, faster
and better:**

If you are

- planning your home
- renovating your house
- laying carpet or other flooring
- wallpapering or painting
- moving house or setting up home
- lining things up or measuring for any other purpose.

Make life easy: With the PREXISO X2 you can measure any distance quickly and efficiently. This handy laser measuring instrument is the ideal tool for all your distance measurements. With one press of a button you can take measurements in seconds without assistance – but with laser precision: Measure like the professionals!

PREXISO
LASER DISTANCE METER

**Simply made
to measure!**

Intuitive to operate

But still small, handy and readily available!

At the press of a button

With the PREXISO X2 every distance measurement is child's play!

Functions include

Addition, subtraction, area and volume calculation, Pythagoras, switch reference or select other units of measurement: It's all there!

Laser technology inside

Measure like a professional with laser-precision, e.g. even in cluttered surroundings!

Easy-to-read display

The results are shown clearly in the display!

Measure like a professional

Range up to 30 m
Typ. accuracy +/- 2 mm
